TECHNICAL DATA SHEET

SCAN MASTER 1

THE NEW SCAN & COPY SYSTEM

The SMA SCAN MASTER 1 is a versatile scanner for books, newspapers, photographs, maps, architectural drawings and other documents up to A1.

Operation Independent from Ambient Light

A special LED light illuminator without any ultraviolet and infrared radiation guarantees harmless and uniform illumination. As the illuminator is located inside the scan head and is simply moved across the original it doesn't matter where the scanner is being placed. Bright sunlight or intensive ceiling light does not interfere in the scanning process. Further there is no external light source irritating the operator.

Please note that ambient light is way more harmful to the original than the illuminator utilized in the SCAN MASTER 1!

High Quality Color Scanning Technology

The SCAN MASTER 1 is equipped with a unique scan engine. It provides high quality images based on state of the art technology. Bitonal, grey scale or color images can be produced with an optical resolution of 600 dpi.

Networking Made Easy

The SCAN MASTER 1 is a network scanner. Communication with the PC takes place via network card.

Ultrafast Scanning Speed

The SCAN MASTER 1 was designed for applications where speed is an issue. With a scan speed of 9 seconds (A1, 600 dpi) it is the fastest scanner of its kind. Scan speed and interface technology (network) offers the highest possible productivity.

Versatile, Versatile, Versatile...

The SCAN MASTER 1 is available in many different versions. The floor model is equipped with a motorized book cradle. The table top version is available with manual or motorized book cradle. For digitizing flat originals an A1 plate to cover the book cradle is provided.

Book cradle and scanner are being operated conveniently via foot switch. A hand switch is alternatively available.

TECHNICAL SPECIFICATIONS

Optical Resolution

600 dpi

Scan Speed @ 600 dpi color

9 seconds

Color Depth

Internally 36 Bit
Externally 24 Bit (Color), 8 bit (Grey Scale)
